Namib Desert Safari

Itinerary of the 3 – day safari into the Namib Desert

Day 01:

The Safari starts after breakfast from your hotel in Swakopmund. We drive via the moonlandscape into the Namib Naukluft Park, Namibia's largest National Park. „Dead“ plants rapidly become lively and green when given water. We'll put up camp at the foot of „Bloedkoppie“ mountain. Enjoy the fascinating colours of the sunset.

Day 02:

On our journey to the plains of „Tinkas“ we might encounter Springbok, Oryx and Ostriches. A walk in the Tinkas plains reveals that the Namib Desert is alive. Many different insects lead a hectic life, for example, after a shower of rain the desert fauna and flora explodes. During midday we drive into the Swakop River and set up camp in a nice gorge.

Day 03:

Bizarre looking rock formations indicate the age of the desert, which is estimated at 60 million years. The „Living Stones“, Quiver Trees and the indigenous Welwitschia Mirabilis plants adapt to survive in the Namib Desert. The Swakop River is also home to different game, e.g., the shy Klipspringer, Baboons and Kudu. After a visit at the dunes the safari ends during the afternoon in Swakopmund.
